

COLOR SWATCHES & AVAILABILITY

More Color = More Life

At Nicolock we're known for more color and more life in the vast assortment of products that we make.

Unlike many manufacturers that only produce dull, drab shades of brown and gray, we offer everything from simple monochromatic colors to complex earth tones, with a few pastels thrown in for good measure. Your pavement can either blend in with the background or make a bold statement at your home or business. Looking for something that is out of the ordinary? Custom colors are available (minimums may apply) from the industry's leading provider of colored concrete products.

ABOUT COLOR

> Product colors and blends are illustrated as accurately as photo reproduction allows. Due to variables in photo and print processing, colors of actual units may not match exactly. We strongly recommend that final selection of color be based on viewing several physical samples.

> Shade variations are inherent in colored concrete products using natural materials. Delivered product can vary slightly from physical samples. When installing colored concrete products, units should be selected randomly from several packages simultaneously.

> Many Nicolock Paving Stones are produced with our exclusive Paver-Shield™ process utilizing the highest quality color pigments and raw materials available. This process ensures that each paving stone is thoroughly saturated with formulated aggregates and color pigment throughout the full thickness of the paver, not just a surface coating.

WALL, PIER & CAPSTONE SWATCHES

See chart on inside back cover for product color availability.

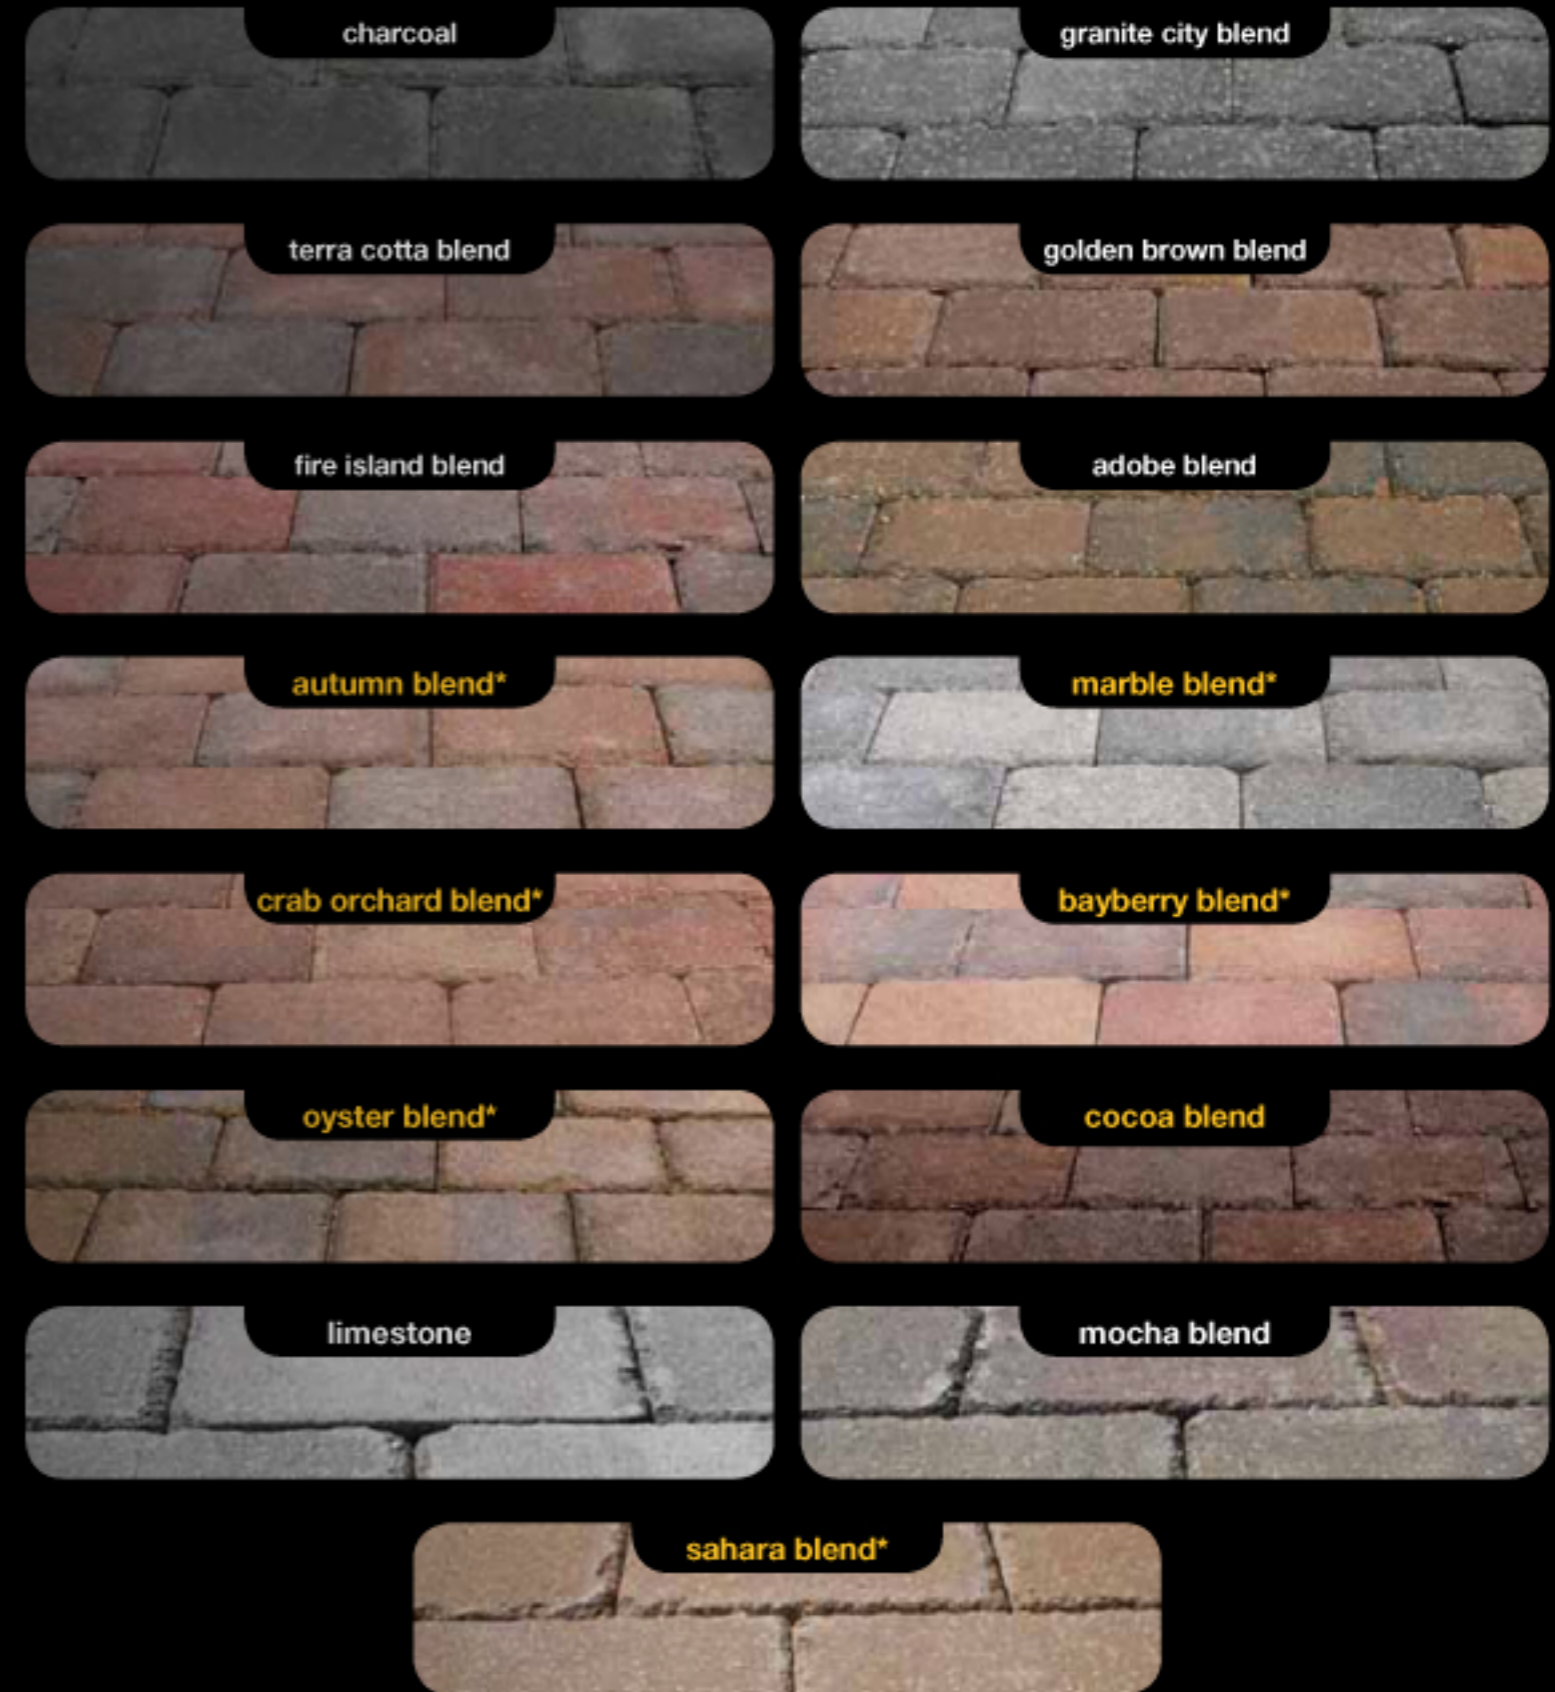

The color illustrations in this catalog are as accurate as photography and printing processes allow.
